

## **BAC227 – BAC227S**

# **LAWN WATERING POINTS**

### **FUNCTION :**

- Designed to create watering points in parks and gardens.
- Square model with 45° connection (registered pattern).
- The wall mount is possible for use as water faucet.

BAC227

### **DESCRIPTION :**

- Whole-body of lawn watering point is made of polyvinylchloride (PVC), material offering a good resistance to external attacks such as freeze, UV, corrosive action of pollution and acids.
- Complete closure of PVC cover, even on tiled or paved surfaces.
- Max pressure: 8 bars

### **CHARACTERISTICS :**

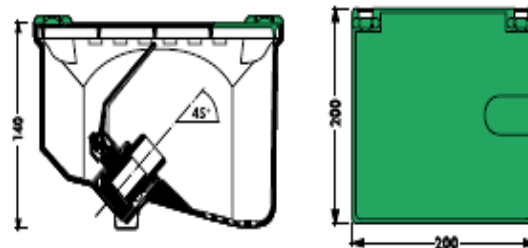

- Inlet is 20 x 27 (3/4"). Outlet is 20 x 27 (3/4").
- The valve is made of nickel plated brass, compliant with drinking water.
- Valve closure with tape type 1/4 turn with plastic coated handle.

### **MAINTENANCE :**

- The self cleaning edge of the case enables the proper closure of the lid.
- There is no water retention in the case.

### **IMPLEMENTATION :**

- The 45° inclined connection facilitates the hose plug and reduce constraints on the water supply lines.
- It allows the case connected with the semi-rigid to follow soil compaction.
